

# ILER BOILER BOILER

INDUSTRIAL STRENGTH, MAXIMUM  
EFFICIENCY.

<b>Ton / LT</b>	<b>Serpentine Number</b>	<b>Bar</b>	
250	Single Serpentine Double Serpentine	10 / 12	Stainless steel
300	Single Serpentine Double Serpentine	10 / 12	Stainless steel
750	Single Serpentine Double Serpentine	10 / 12	Stainless steel
1000	Single Serpentine Double Serpentine	10 / 12	Stainless steel
2000	Single Serpentine Double Serpentine	10 / 12	Stainless steel
3000	Single Serpentine Double Serpentine	10 / 12	Stainless steel

The FIRAT Boiler maximizes energy savings thanks to its high-performance serpentine structure and low-coefficient insulation. It provides significant economic advantages to businesses by reducing energy costs, especially in large-scale projects.

## Places of Use

- ✳ Housing projects (apartments and sites)
- ✳ Hotels and tourism facilities
- ✳ Factories and production facilities
- ✳ Hospitals and health centers
- ✳ Schools and public buildings
- ✳ Sports halls and social facilities
- ✳ All businesses that need industrial hot water

Ton	Serpantin	Bar	Material
250 LT	Single / Double Serpentine	10 - 12	Stainless Steel/Galvanized

The 250-liter FIRAT Water Heater is a compact storage solution designed to quickly and efficiently meet hot water needs in small residential projects, commercial establishments, and individual use. Its high-density insulation minimizes heat loss, increases energy efficiency, and enables long-term hot water use. With its lightweight, durable, and stylish design, the 250-liter model adapts to tight spaces and offers ideal performance for daily use.

Ton	Serpantin	Bar	Material
500 LT	Single / Double Serpentine	10 - 12	Stainless Steel/Galvanized

The 500-liter FIRAT Water Heater is designed to efficiently meet the hot water needs of small and medium-sized businesses and residential projects. Its compact design allows for easy installation in tight spaces. High-density insulation and rapid heat transfer minimize energy losses. The system is fully controlled thanks to the thermometer, thermostat, and circulation outlets.

Ton	Serpantin	Bar	Material
1000 LT	Single / Double Serpentine	10 - 12	Stainless Steel/Galvanized

The 1000-liter FIRAT Water Heater is a professional storage solution developed for businesses with higher hot water needs. Its robust coil structure and wide connection points deliver high performance in central systems. Its durable insulation ensures stored water stays hot for extended periods, increasing energy savings.

Ton	Serpantin	Bar	Material
2000 LT	Single / Double Serpentine	10 - 12	Stainless Steel/Galvanized

The 2000-liter FIRAT Water Heater is a high-capacity system specifically designed to meet the intense hot water needs of large facilities without interruption. It provides high heat transfer performance with double or single coil options. It is compatible with industrial connection outlets, central heating, and large-volume systems.

Ton	Serpantin	Bar	Material
3000 LT	Single / Double Serpentine	10 - 12	Stainless Steel/Galvanized

The 3000-liter FIRAT Water Heater is a professional hot water storage solution developed for large businesses and industrial facilities. Its large internal volume allows it to simultaneously supply multiple consumption points. Its superior insulation, ease of maintenance, and high efficiency reduce long-term operating costs.
