In Fırat Energy's modern production facilities, we produce hygienic, durable and long-lasting water tanks using high-quality polyethylene raw materials.

Our production line is equipped with state-of-the-art rotational molding machines and fully automatic control systems.

Storage solutions for every need: With our wide range of products, from 500 liters to 20 tons, we meet our customers' water and liquid storage needs quickly, reliably, and economically. At Fırat Energy, we are at your service throughout the entire pre-sales and post-sales process.

FIRAT 10 TON
FIRAT 10 TON

A blue cylindrical water storage tank stands in a field of young green plants, likely corn. The tank is labeled "FIRAT DEPO" and "1000 LT". A green hose is connected to the tank and lies on the ground. In the background, a vast field of mature yellow wheat stretches to a line of trees and a small building under a blue sky with white clouds.
